

RESTAURANT MANAGEMENT, MADE CLEAR

**Every table. Every order.
One calm system.**

Odr connects front-of-house, kitchen, billing, and the owner - without the clutter.

Restaurant software should reduce the rush.

WHAT OWNERS FIGHT TODAY

-  Repeated order entry
-  Lost or unclear KOTs
-  Slow table closure
-  Menus scattered across channels

ODR KEEPS ONE SOURCE OF TRUTH

**One order moves through
table, kitchen, and bill.
Everyone sees the same
state.**

LESS TRAINING

FEWER MISTAKES

One order. No duplicate work.

The captain and diner use the same live menu. Staff confirms table-QR orders before the KOT fires. Every item joins one running table bill.

Fast enough for the rush. Clear enough for day one.

Captain

Open a table, find items fast, add notes, and send the KOT from a phone or tablet.

Cashier

See every active table, settle cleanly, generate the invoice, and print.

DESIGNED FOR ONE-HANDED OPERATION

- Large tap targets
- One screen, one job
- Clear order state
- Explicit offline status
- Fast reprint access

KITCHEN

Readable across the room. Calm under pressure.

KDS VIEW

04:12 PM

Use the display when available. Print the same clear KOT when it is not.

Your menu becomes the operating system.

MENU

Add categories, items, prices, tax classes, and availability.

TABLES

Define every table once and follow its live order state.

TABLE QR

Give each table a unique code linked to the same live menu.

Illustrative table code

Recommended guardrail: staff confirms a diner order before its KOT reaches the kitchen.

Close the table cleanly. Know the day clearly.

INVOICE	
MC/2026-27/00001	
Masala dosa x2	240.00
Lime soda x1	60.00
Subtotal	300.00
CGST + SGST	15.00
.....	
TOTAL	315.00

MADE FOR INDEPENDENT RESTAURANTS

Start with the essentials. Keep the same clarity as you grow.

SMALL CAFE

10 items

Counter billing

Printed KOT

BUSY DINING

40 tables

Captain ordering

KDS + billing

GROWING BRAND

Multiple outlets

Shared menu

Owner visibility

No enterprise maze. No feature tax. Just the workflow each outlet needs.

A strong core now. A focused path forward.

BUILT IN THE CORE TODAY

- Menu categories and items
- Table order lifecycle
- KOT firing and settlement
- GST invoice generation
- Network printing foundation

DESIGNED NEXT

- Live table-QR ordering
- Offline order persistence
- Owner daily reports
- Aggregator synchronization
- Arabic RTL and ZATCA readiness

Roadmap items are shown as direction, not as currently available customer features.

THE ODR PROMISE

Restaurant software should feel this simple.

One menu. One order flow. One clear view of the day.
